

C++ Assignment No 6

- 1) A shop sells book or tapes. There is 5% discount on tapes, while 10% discount on books. Assuming that each user purchase 3 products (either book or tape), calculate final bill. The program should be menu driven and should not cause memory leakage.
- 2) A geometric application needs various shapes like rectangle, square or circle. Write a program to input 5 shape details from the user (as per user choice). Implement a global function to calculate total area and another global function to calculate total perimeter.
